

## Datasheet

### UBK - Glass door U bracket for magnetic locks

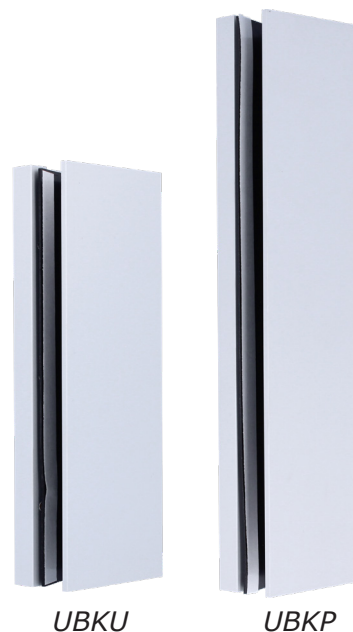

#### Product Description

The UBK Series are universal glass door "U" brackets. They can accept 300kg, 400kg and 500kg maglocks and armatures and fit 9mm to 15mm thick glass.

The UBKU is specifically used to mount armature plates and the UBKP the maglock body or electric lock surface housing.

The UBKP mounts the L-bracket above the door, to which the electro-magnet is fitted. For an inward-opening door, a second UBKP is required to fit the Z-bracket.

UBKU is used in combination with UBKP for mounting the magnet's L-bracket.

#### Key Features

- Glass clamp brackets
- For internal surface electro-magnetic locks
- For glass doors of max 15mm thickness
- Fits armatures for magnetic plates and surface lock housings
- Provides secure fixing to glass doors
- Accepts 300kg, 400kg and 500kg armatures

 Certification

 DEEE

**RoHS** Certification

 IK10

## Product Specifications

<b>Material:</b>	Satin adonised aluminium (SAA)
<b>Mounting:</b>	Surface
<b>Weight:</b>	UBKU: 0.53kg UBKP: 0.67kg
